

GHS2026 Conference Workshops

Day One - Tuesday 9 2026, 1:45pm-3:45pm

Room 404

Saving Lives in Complex Settings: Advancing IPC for Outbreak Preparedness and Response in Ukraine, DRC, and the Philippines.

The workshop, hosted by the U.S. Department of State-funded EpiC project, will provide a platform for experts from conflict-affected countries and international partners to share experiences, innovations, and lessons learned from implementing IPC programs in high-risk and resource-constrained environments. It will also explore how interventions in the animal health sector contribute to reducing antibiotic resistance and promote intersectoral collaboration.

Aim & Objectives:

- Showcase practical strategies for adapting and sustaining IPC in emergencies and low-resource settings
- Foster global collaboration to strengthen IPC as a core component of health security s
- Discuss lessons learned from implementing innovative approaches for IPC in crises

Target audience:

This workshop is intended to provide health security professionals from crisis settings, frontline IPC practitioners at labs and hospitals, humanitarian and emergency response experts, policymakers, donors, and researchers experiences, innovations, and lessons learned from implementing IPC programs in high-risk and resource-constrained environments.

Proposed geographical or population focus: This workshop is open to any conference delegate/worldwide.
